## Best Research Paper Award

Screening committee selected in the submitted manuscripts, if any paper deserves and screening committee approved the research paper, than society provides the certificate of the Best research paper award to concerned scientist.

## Young Scientist award

The Young Scientist Award program was created by society's commitment to science and nature. Society has created the competition in conjunction with animal, food, medicine, plant science, and engineering & management departments at various universities in order to promote research and talent development. Scientist based in animal science, dairy science, veterinary science, agronomy, biological science, Agricultural science, engineering & management s or other related disciplines can submit their C.V. for the young Scientist award.

Young scientist must have the age below 35 years, and he/she will submit their C.V. and all the credential to the Society. After receiving, it will pass through the screening committee in first phase, and in final phase it will pass through Young Scientist Award committee

## Best Scientist award

The Best Scientist Award program was created by society's commitment to science and nature. Scientist based in animal science, dairy science, veterinary science, agronomy, biological science, Agricultural science, engineering & management sciences or other related disciplines can submit their C.V. for the young Scientist award.

Young scientist must have the age above 35 years and below 50 years. He/she will submit their C.V. with all the credential to the Society. After receiving, it will pass through the screening committee in first phase, and in final phase it will pass through Best Scientist Award committee.

## Life Time Achievement award

The Society of Science and Nature has established the Lifetime Achievement Award to recognize those who have achieved academic excellence in their field of study/ Research and to honor those who have made significant and contributions to the field of animal science, dairy science, veterinary science, agronomy, biological science, Agricultural science, engineering & management sciences or other related disciplines and/or in the development of novel technologies that have advanced in science. Nominee must have made a significant contribution to the development and/or understanding of in the field of animal science, dairy science, veterinary science, agronomy, biological science, Agricultural science, engineering & management sciences or other related disciplines that historically has and will continue to distinguish their scientific work. Nominating letter must include: supporting letters from members of the scientific community who qualify the importance of the nominee's contribution.
